The SCT BusinessPilot

🚀

What is the SCT BusinessPilot?

The SCT BusinessPilot is an all-in-one business administration software system, capable of handling dozens of administrative tasks. BusinessPilot is used to manage and store all of your businesses operations, data and information.

Our Proprietary Business Software has been carefully and precisely designed, developed and programmed with the aim of taking your businesses to the next level in your admin departments and other business sectors.

The SCT BusinessPilot has been developed and split into three different operating versions to be able to provide functionality for commercial businesses, manufacturing businesses and service providers.

The SCT BusinessPilot has been developed as a universal system through the design of dozens of pieces of software that work together to create an easily deployable and customizable system which can quickly and efficiently be setup in all businesses and corporations.

BusinessPilot is guaranteed to make you business run more efficiently, reduce human error and administrative mistakes by up to 95% through the automation of many administrative processes and save your business money in the long term.
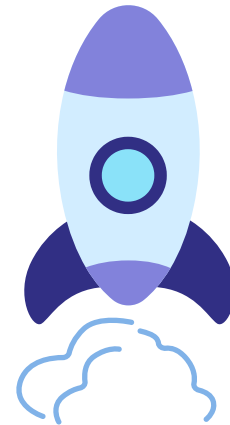

The Version?

The SCT BusinessPilot is by definition a universal software system, however to streamline the immediate efficiency and effectiveness of BusinessPilot, three separate base versions have been developed. These three base versions are specifically associated with the type of business requiring the system.

These three versions are:

- Commercial BusinessPilot
- Manufacturing BusinessPilot
- Service Provider BusinessPilot

The bulk of functionality remains the same between all three versions. The fundamental difference between each version is the backbone of the system.

The Commercial BusinessPilot has an emphasis on the use of inventory management as well as product and stock management. The Manufacturing BusinessPilot has an been built around the use of manufacturing processes and procedures, like the Service Provider BusinessPilot that has been developed around service providing functionality.

The Version?

The best suited base version of the SCT BusinessPilot for your business is the version that will be deployed. Thereafter, your BusinessPilot will be tweaked and tailored to fit your businesses procedures and day-to-day environment perfectly.

Manufacturing BusinessPilot

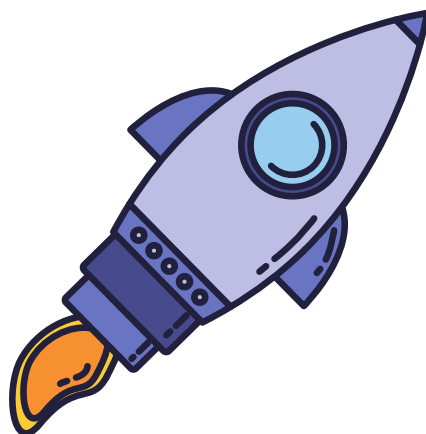

Commercial BusinessPilot

The Design?

Each version of the SCT BusinessPilot comes with the black and white or full color icons option. The color scheme is also fully customizable and all placeholder logos will be replaced with your own companies logo.

All document designs including: quotations, invoices, order forms, job cards and receipts will continue to follow the same design as currently used by making use of template documents. These templates are fully customizable allowing you to adjust and change your document designs whenever needed.

In summary the design of your SCT BusinessPilot includes:

- Black and White Icons or Color Icons.
- Fully customizable color scheme.
- Your own companies logos.
- Fully adjustable document design.

The Functionality?

Between all the three versions of the SCT BusinessPilot there are over 24 different pieces of software including:
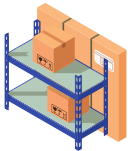

Login and Authentication

User Management

User Roles and Privileges

Complete System Logs

Inventory Management

Stock Control

Manufacturing Management

Service Management

Quotation Management

Invoice Management

Order Management

Sales Management

Accounts Management

Supply Chain Management

The Functionality?

CRM

Business Analytics

System Messenger

Interactive Calendar System

Tasks Allocation

Document Storage

System Alerts

Administrative Control

Microsoft Word Integration

LibreOffice Integration

The SCT BusinessPilot is a constantly evolving platform , the list of functionality continues to grow as the system evolves. All upgrades to the SCT BusinessPilot including new pieces of software, new management sections and new integration systems come without additional fees.

Deployment:

The SCT BusinessPilot is a large and complex software platform with plenty of moving parts. Thus, it is necessary for a deployment process to take place in order to ensure that the system is perfectly setup and in place for maximum efficiency.

To ensure a smooth process in deploying the SCT BusinessPilot for all businesses the following deployment strategy is followed:

- Selecting the correct SCT BusinessPilot version.
- Making adjustments in the system functionality to ensure your BusinessPilot suits your businesses operations and procedures.
- Customizing your BusinessPilot design to the design you want.
- Migration of your data from your past systems to BusinessPilot.
- Setup and installation of your BusinessPilot applications.
- Staff training sessions on how to use your BusinessPilot system.

BusinessPilot License:

Your SCT BusinessPilot operates on a monthly system subscription called the BusinessPilot license. Rather than paying for every user you add to the system, your BusinessPilot license works on a fixed fee to ensure permanent maintenance of your system.

Your SCT BusinessPilot license allows us to:

- Monitor the status of your system to ensure permanent connectivity and minimal downtime.
- Provide updates and upgrades to your BusinessPilot.
- Do secure back-ups of all your data so that no file corruption can take place.
- Provide 24/7 support via our communication lines.
